Trinity™ Scent Control Technology For over 10 years Robinson Outdoor products has worked to develop Trinity™ Technology, the new pinnacle in human scent control. Trinity Technology is designed around a cutting edge synthetic polymer that was specifically created to adsorb human odor. With a huge surface area and more adsorptive kinetics, Trinity Technology will surpass the old industry standard of scent control and set the bar at a whole new level. With clothing, liquids, detergent and spray; Trinity will have a product available for everyone's budget and needs. Simply put- this technology is amazing and available nowhere else.

Tree Spider Compatible The Spider Speed Clips™ patented system allows for full system integration by securing the Tree Spider® harness into your favorite ScentBlocker® Jacket. Just attached 4 quick clips and pull the tether through the jacket slit. When it's time to hunt, simply put your jacket on, fasten your leg buckles and waist buckle, then zip up! Tree Spider® is the only product to offer this technology.
